NEW! Indoor & Outdoor LASERS

– Remote controlled Fat Beam technology safely frightens birds away

Laser beams are well-documented to chase away pest birds. The beam seeks out their roosting-spots, alarming and confusing them, causing them to flee. New laser technology in convenient, economically-sized units for smaller areas. Now available for outdoor use also (stake or bracket mount) to deter roosting birds, geese on ponds, etc.

- 1 - 5 milliwatt Tri-colored fat-beam laser power (yellow, green, red)
- State-of-the-art, fully registered, consumer-safe devices
- Works day and night: laser beams constantly change pattern and location to prevent acclimation
- REMOTE CONTROLLED for safety and convenience; includes optional timer function
